Setup Instructions

This document describes how to install the drive power boards and power supplies to make your NEOxl 80 or NEOxl Expansion ready for service.

⚠️ **WARNING:** To reduce the risk of electric shock or damage to equipment, always remove any power cords while working with the unit.

WARNUNG: Um das Risiko eines elektrischen Schlags oder Schäden am Gerät zu vermeiden, ziehen Sie stets den Netzstecker, bevor Sie an der Einheit arbeiten.

AVERTISSEMENT: Pour réduire le risque de choc électrique ou endommagement de l'équipement, retirez toujours les cordons électriques en travaillant avec l'appareil.
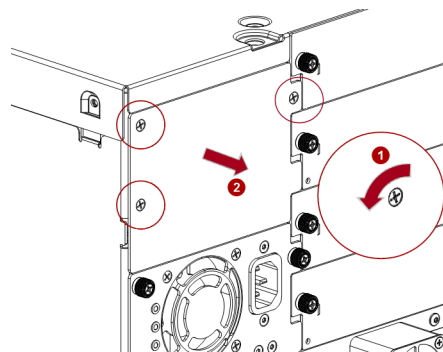

⚠️ **CAUTION:** While working with the unit, observe standard Electrostatic Discharge (ESD) precautions to prevent damage to micro-circuitry or static-sensitive devices.
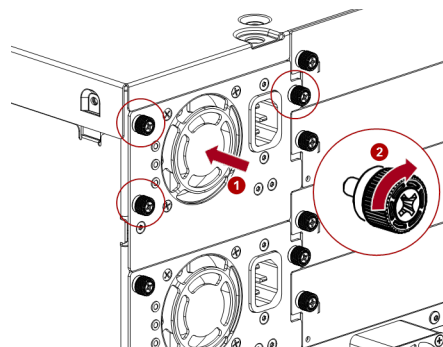

Install Power Supplies

Remove the Cover Plate

1. At the rear, with your fingers, loosen the **three Phillips screws** on the power supply cover.
2. Using the thumbscrews (one on each side), pull the **plate** off and set it aside.

Install the Power Supply

1. Position the new power supply onto the **alignment rails** and slide the **power supply** into the library until it is flush with the back panel of the library.
2. Tighten the **blue captive thumbscrews** with your fingers to secure it to the library.
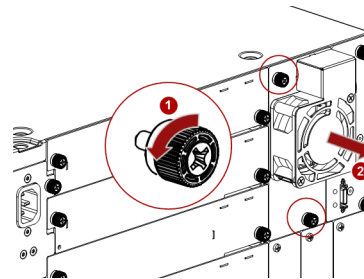

Install Drive Power Boards

NOTE: *The NEOxl 80 has one drive power board to install; the NEOxl Expansion has two drive power boards.*
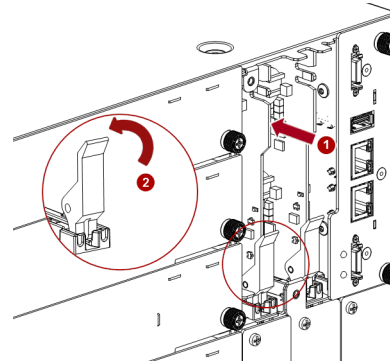

Remove the Chassis Fan

1. Loosen the **two blue captive thumbscrews** on the chassis fan assembly.
2. Using the thumbscrews, slowly remove the **chassis fan assembly** from the library and set it aside.

Install the Boards

1. Position a drive power board onto the **alignment rails** and slide the **drive power board** into the library until seated firmly.
2. Push the **latch** up until it snaps into place.

   When the drive power board is installed correctly, the latch will be tight.
3. For the NEOxl Expansion, repeat Steps 1–2 for the remaining drive power board.

Reinstall the Chassis Fan

1. Align the **tabs** on the library with the slots at the top of the chassis fan assembly.
2. Push in the **chassis fan assembly** until it is flush with the back panel of the library.
3. Tighten the **blue captive thumbscrews** with your fingers to secure it to the library.
