

# Third Party SnapServer Drive Specifications

May 2015

SnapServer appliances configured for third-party drives must use any of the specified Enterprise-class drives listed below.

The following conditions must be observed:

- All drive speeds for drives installed in an appliance must be the same.
- The drive capacities for drives installed in an appliance may differ.
- Other drives with similar specifications as the qualified drives may function in the appliance but only those on the qualified list below are guaranteed.
- Non-Enterprise-class and 4K sector drives are not supported on SnapServer servers.

## Desktop Server Qualified Drives

Manufacturer/Model	Drive Speed (RPM)	Capacity
WD Red	5900	1TB-6TB
Seagate NAS	5900	2TB-4TB
