

Archiving for regulatory and compliance

RDX TENCASE

RDX WORM media meets an expanded set of regulatory and compliance requirements. It is ideal for use with a large number of archiving applications, like enterprise content management and document management systems, where data must not be deleted or overwritten.

Key Benefits

- Meets regulatory and compliance requirements
 - Assessed by KPMG
- Field of applications
 - Enterprise Content Management Systems (ECM)
 - Document Management Systems (DMS)
 - Finance data
 - Data logging
 - Patient files like PACS
 - Video and voice recording
 - Documentation
- Rugged, secure media
- Easy to use, no change in workflow
- Transparent application integration
- High transfer rates and fast data access
- High capacity, up to 4TB per media

Not just for business data

Professional IT departments have trusted in RDX technology as a reliable and affordable backup and disaster recovery solution for years. With RDX WORM, this technology can also be used as storage for regulatory and compliance. In addition, semi-professional users can store and archive their photos and movies in an undeletable way as well as secure them against virus attacks with RDX WORM.

WORM

WORM (Write Once Read Many) refers to a technology that prevents data from being deleted, changed or overwritten. Files can be added and accessed as usual. WORM media are integrated in digital archiving applications and are primarily used to meet regulatory and compliance requirements, where data must not be deleted, overwritten or changed. Capacities up to 4TB per media, reduces the number of media to be managed. The rugged design offers more reliability in comparison to optical media.

Easy to use

Integrating RDX WORM media is as easy as using conventional RDX technology. The Windows®-based software rdxLOCK enables the WORM functionality and manages read-/write-access. RDX WORM is transparent for archiving applications and document management solutions. Even files that are copied to the media via drag and drop are secured immediately by the WORM functionality media and can be seamlessly integrated in existing workflows and enhance compliance requirements.

Regulatory certification

rdxLOCK software product compliance has been assessed by KPMG AG Wirtschaftsprüfungsgesellschaft, Frankfurt am Main, to numerous regulations. Please see the specifications on page 2 of this document.

RDX

The RDX® QuikStor® technology combines the advantages of tape (portability, long archival life) with the advantages of disk-technology (high performance, fast data access, data reliability). RDX media are rugged, drop-resistant and electrostatic-proof removable disk systems which secures data for backup archiving, transport, data interchange and off-site storage.

RDX TENCASE

RDX TENCASE is the ideal solution for transportation and long-term safe-keeping of up to 10 RDX media. RDX TENCASE is a rugged case, which withstands drops, dust and harsh environments. It is water-resistant and can be secured with two padlocks for theft-protection of critical data.

RDX WORM field of applications

RDX WORM can be deployed in a variety of applications as a media which meets regulatory and compliance requirements. Enterprise Content Management and Document Management Systems contain documents which have to be archived in an unchangeable manner to meet compliance and regulatory requirements. In the medical arena for example, patient files, x-rays, billing information, surgery documentation and hospital records must be archived and safeguarded to comply with standard laws and practices. Also, documentation, technical plans and audits have to be stored in a secure manner, as they are needed for legal investigations or compliance audits.

RDX WORM is also important for voice and video recording as this data could be provided as a proof in court case. This also applies to financial data records and data logging applications. In addition, small and medium-sized businesses can use RDX WORM to archive their tax-relevant data and accounting data for a certain amount of years for auditing purposes.

An additional feature of rdxLOCK software is RDX RansomBlock. This functionality protects backups against virus and malware like ransomware by securing and monitoring write activities. RansomBlock is an elective option of the rdxLOCK software and included in the RDX WORM media license.

RDX drives can be directly installed into application servers to integrate RDX on the hardware side. The external drive is attached via USB and offers a fast and easy deployment with laptops and desktops.

Our **RDX® QuikStation®** is a removable disk appliance with 4 or 8 RDX drives. It connects easily via iSCSI into existing networks and is well suited for virtual environments or workgroups with several computer systems.

Specifications			
Media Models	8868-RDX: 1TB WORM Cartridge	8869-RDX: 2TB WORM Cartridge	8870-RDX: 4TB WORM Cartridge
Reliability & Data Integrity			
Unrecoverable Error Rate	1 error in 10 ¹⁴ bits read		
Cartridge Drop Shock (Non-operating)	1m (39.4in.) drop to tile over concrete floor		
Load-/ Unload (Minimum)	5,000 insertion / removal cycles (media), 10,000 insertion / removal cycles (drive)		
Archival Environmental			
Cartridge Archive Storage Life	> 10 years (HDD) offline storage in archival environment		
Archival Storage Environment	5° to 26°C (41° to 78°F), 5% to 95% relative humidity		
Maximum Wet Bulb	25°C (77°F) (non-condensing)		
rdxLOCK Software Licenses	8868-SW: 1TB software license	8869-SW: 2TB software license	8870-SW: 4TB software license
Regulation Certification	SEC 17a/4F, CFTC 1.31 (b) - (c), IDW PS 800, GeBüV, GoB, GAAP, IDW RS FAIT, GoBD (For further details see certification notice or contact our sales team)		
System Requirements			
Operating Systems Server	Windows Server 2008 SP2 Standard & Enterprise Edition, 32-bit, 64-bit; MS Windows Server 2008 R2 SP2 Standard & Enterprise Edition, 64-bit; MS Windows Server 2012 Standard & Enterprise Edition, 32-bit, 64-bit; MS Windows Server 2012 R2 Standard & Enterprise Edition, 64-bit; MS Windows Server 2016		
Operating Systems Desktop	MS Windows 7, 32-bit, 64-bit; MS Windows 8, 32-bit, 64-bit; MS Windows 8.1, 32-bit, 64-bit; MS Windows 10 (Itanium based systems are not supported)		
Hardware	RDX QuikStor internal SATA, SATA III, USB 2.0 and USB 3.0, RDX QuikStor external USB 2.0 and USB 3.0 RDX QuikStation, iSCSI (RDX single drive mode and disk autoloader mode only)		

Sales and support for Overland-Tandberg products and solutions are available in over 90 countries. Contact us today at salesemea@overlandtandberg.com. Visit OverlandTandberg.com.
